-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 120. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "said connector" in lines 3 and 5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wuerfel (US 4,111,164).

Wuerfel discloses a spring-supported coupling device used in an engine and coupled between a piston (12) and a crankshaft (14), comprising: a first connector (16) pivoted to said piston; a second connector (19) pivoted to said crankshaft; a rod member (24) coupled between said first connector and said second connector and axially movable relative to said first connector and said second connector (col. 3 lines 23-46); and a spring member (18) axially compressibly connected between said first connector and said second connector around said rod member (see Fig 2).

Re claim 2, said first connector (16) comprises a receptacle at a bottom end thereof, the receptacle of said first connector defining a downwardly axially extended receiving hole (see Fig 2); said second connector (19) comprises a receptacle at a top end thereof, the receptacle of said second connector defining an upwardly axially extended receiving hole (see Fig 2); said rod member has two ends respectively inserted into the receiving hole in the receptacle of said first connector and the receiving hole in the receptacle of said second connector (see Fig 2).

Art Unit: 3682

Re claim 3, two fastening devices (16a, 19a) respectively fastened to the periphery of the receptacle of said first connector and the periphery of the receptacle of said second connector to fixedly secure two distal ends of said spring member to said first connector and said second connector respectively (col. 3 lines 1-7).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
